

## 1. CASEBROOK NEED ANALYSIS

The Board received an update on the Casebrook Needs Analysis. Graham Condon advised that there was research from SPARC (the new Sport and Recreation agency) that should also be considered in relation to the Casebrook research.

The Board **decided:**

1. The Community Board and Council staff present the results of this research to the community at a community forum.
2. That this forum be an opportunity to update the community on the initiatives and development carried out to date and identify the current emerging trends and issues.
3. That further research be carried out regarding the specific trends and issues affecting Maori communities within the area. The response of Maori communities that participated is inconsistent with the percentage of Maori residents. It has been identified that the services and activities specifically targeting this sector of the community are inadequate.
4. That further research be carried out on the Pacific Island community within the area.
