

13. SIGN OF THE KIWI – TREE REMOVAL

The Regional Parks Manager reported, seeking approval to remove a mature pine tree and macrocarpa trees at the Sign of the Kiwi.

The Board **resolved**:

1. That the pine tree and macrocarpa tree nearest the Sign of the Kiwi café steps be removed this winter to reduce immediate health and safety issues caused by shading.
2. That the remaining six macrocarpa trees be limbed this winter to improve their shape and appearance and to improve underplanting establishment.
3. That the remaining six macrocarpa trees be removed when the replacement vegetation is of sufficient height to screen the garage and the root systems are established and protect the bank.
