

12. TREE PLANTING

The Parks and Waterways Area Advocate reported, requesting funding for a proposal to plant trees on the frontage of properties in one street in each ward where street trees are unable to be planted. It was intended that the trees would be gifted to the residents and that they would be supplied with a pamphlet with instruction on the maintenance of the trees. Local school children could be involved with the planting. Members suggested that the planting could be incorporated into Neighbourhood Week activities.

The Board **resolved** to allocate \$5,000 from 2002/03 Discretionary Funds towards a pilot project to plant trees on the frontage of properties in streets where street trees are unable to be planted, if a suitable street in each ward can be identified.
