

## 18. NATIVE TREES PLEASE

The Board received a report regarding the outcome of the Native Trees Please Millennium Project and a request for funding for information panels to be installed at the site at Styx Mill Reserve. Board members requested that some form of recognition of the Board for its support of the project be included on the panel.

The Board **resolved:**

1. That the information be received.
2. That the concept of the schools and/or local communities involved with the Native Trees Please project formally adopting the planting site in their area be investigated.
3. That \$1,840 be allocated from 2001/02 Discretionary Funds to the Parks and Waterways Unit for the installation of the interpretation panel at the Styx Mill site.
