

3. DROP-OFF CENTRES FOR HOUSEHOLD HAZARDOUS WASTE

The Committee considered a report from Dave Harris, Refuse Operations Manager, on the proposed publicity regarding the Household Hazardous Waste Drop-Off Centres.

The report provided background information to the establishment of the drop-off points for HHW at the recycling centres at three Council refuse stations and the current intentions regarding advertising and publicity for the drop-off centres.

Members noted that a draft brochure detailing the types of HHW accepted at the drop-off points, safety precautions and alternative disposal options had been prepared for distribution at refuse stations and service centres and other commercial outlets.

The Committee **decided** that in addition the household hazardous waste publicity be redesigned as necessary for insertion in rate demands to increase the distribution of information on this matter.
