

1. DEPUTATIONS BY APPOINTMENT

1.2 Christchurch Public Health Strategy

Councillor Ingrid Stonhill briefly elaborated on the background to the Public Health Charter and Strategy for Christchurch.

Julie MacDonald, Community Adviser, further explained the process followed in developing the draft Charter and of the opportunity available for Community Boards to provide feedback on its content.

Members expressed a number of reservations about the intended document especially in relation to possible future cost implications for the Council.

Arising from the discussion which took place, it was **agreed** that there was merit in the Board formulating a response and that this be undertaken through the Board's Community Services Committee.

The Board therefore **decided** that the proposed Public Health Charter and Strategy for Christchurch be referred to the Community Services Committee for further consideration.
