

## 16. CHRISTCHURCH PUBLIC HEALTH STRATEGY

The Board received a presentation on the development process for the Public Health Charter and Strategy for Christchurch. The Charter is a plan for small and large groups to work together, and provides principles and protocols for them to work to. Feedback on the Charter was requested.

One of the Board members queried whether the Treaty of Waitangi should be included in the Principles of the Charter.

The Board **resolved** to endorse the Charter as it currently stands.
