

## 9. WATER SUPPLY ASSET MANAGEMENT PLAN 2002

The Committee considered a report from Eric van Toor, City Water and Waste Unit, seeking formal approval to the revised Watersupply Asset Management Plan which had been previously considered at a seminar of the Committee on 18 April 2002.

The report detailed the key issues of the Asset Management Plan.

The Committee **decided**:

1. That the Watersupply Asset Management Plan 2002 as reported in the summary document dated May 2002 be adopted.
2. That the watersupply capital works and long term operating projections be adjusted in conjunction with the Financial Services Unit, to reflect the Watersupply Asset Management Plan 2002.
