

5. ECO VILLAGE UPDATE

The Urban Development Policy Leader provided an update firstly on the situation with a private group of residents who were looking to establish a village in Scotts Valley. Secondly a staff group was trying to provide insight to the processes associated with an eco village establishment using the Scotts Valley and other sites as examples.

The Committee **decided** that staff resources should not be utilised at this time in a proactive manner in eco village investigations, other than to provide limited assistance to well organised groups.
