

## 2. DEPUTATIONS BY APPOINTMENT

### (a) Catholic Cathedral College - Antarctic Hut Project

Bruce Henley, Deputy Principal of the Catholic Cathedral College and Coordinator of Historic Projects, together with Alf Holt, Construction Supervisor addressed the Committee on the school's intention to build a full size replica of Shackleton's Antarctic Hut at Cape Royds, to be sited at the International Antarctic Centre.

The Committee was advised of the other projects that the school has successfully undertaken and of the benefits to the city of the proposed replica hut. The school was now seeking a substantial grant from the Council towards the cost of constructing the replica hut.

Following the conclusion of the submission the Committee **decided** that the school be directed in the first instance to apply to the Council for a metropolitan fund grant, but should this not be successful, then a report on funding options to assist the school project be brought to the Committee for consideration.
