

## 1. FENDALTON ROAD WIDENING - LEGALISATION OF ROAD MARKINGS

The Board **received** information from the City Streets Unit setting out the formal legalisation of road markings and the installation of traffic signals required to support the Council approved widening scheme for Fendalton Road, the contract for which was nearing completion.

Consideration of the various controls and restrictions was also to be undertaken by the Sustainable Transport and Utilities Committee at its August meeting.

The Board commended Council officers for their management and oversight of the project during the reconstruction period.
