

## 2. HEATON STREET/ST GEORGE'S HOSPITAL ENTRANCE - UPDATE

The Network Operations Team Leader, City Streets Unit provided the Board with an update on matters relating to the new Heaton Street entrance into St George's Hospital since the Board's decision in April 2003 to approve a no stopping restriction along the south side of the street on the approaches to the new driveway.

The City Streets Unit has now begun monitoring traffic in the area with a view to preparing a traffic management plan for the section of Heaton Street between Papanui Road and Elmwood Park that will take into account vehicle and pedestrian movements associated with St George's Hospital and Heaton Street Intermediate School. The result of this work will be reported to the Board in due course.

The Board **received** the information.
