

10. CENTRAL CITY AVON RIVER PROJECT

The Parks and Waterways Manager reported, updating the Committee on progress in developing the Avon River strategy. The report advised that progress on the strategy is being made and some robust background information is now available to direct the project. The draft strategy is expected to be available for elected members' consideration by November this year.

The Committee **decided**

1. That the Committee be provided with regular updates on the development of the policy.
2. That the steering group report to elected members in November prior to releasing the Central City Avon River Strategy for public comment.
