

2. NORTH-WEST AND WESTERN RING ROAD

The Board **received** the information set out in a report to be presented to the Sustainable Transport and Utilities Committee on 25 November regarding the north-west and western sections of the Ring Road, which is to undergo a corridor study and strategic review in the coming year.

The report noted that a number of works were currently scheduled in the five year works programme and that the safety record along the route, with the exception of the Greers/Harewood intersection, did not warrant urgent action. Options for Greers/Harewood Roads were under consideration by the City Streets Network Operations Team.
