

12. PEST REPORT

The Committee considered a report from Kate McCombs (Botanist) on the Council's role with pest management and the proposed establishment of a Christchurch Biosecurity Liaison Group.

The report outlined the relevant legislation applicable to pest management and the responsibilities of the relevant authorities.

The Committee **decided**:

1. That the information be received.
2. That the establishment of a "Christchurch Biosecurity Liaison Group" be supported; the Group to include representatives of Environment Canterbury, the Department of Conservation and the Christchurch City Council.
