

9. ANNUAL PLAN PROCESS 2004/05 MAJOR ISSUES STATEMENT

The Board was in receipt of the Business Unit responses to the major community issues identified by the Board as part of the 2004/05 Annual Plan Process.

The Board and the local community had previously expressed interest in promoting a new recreation and pool complex in south-west Christchurch, and in promoting and developing the existing suburban pools at Halswell and Templeton. The business unit response stated that there was little point in undertaking the required research into these proposals until closer to the time funds were likely to be available, being the year 2011/12.

The Board **received** the information but **decided** to request that (given the knowledge that at least three Community Boards were looking for a similar facility) guidelines for the necessary planning process could be started sooner rather than later.
