

2. OLDER PERSONS' WELLBEING

The Committee considered a report recommending funding support for strategic planning and collaboration to respond to the increasing number of older people in Christchurch.

The Committee **decided**:

1. That the Annual Plan Subcommittee be requested to consider the inclusion of an annual provision of \$75,000 in the 2003/04 Annual Plan for undertaking work associated with identifying priorities and planning for the increase in the number of elderly in Christchurch.
2. To place a high priority on this request on recognition of the importance of addressing the demographic changes for the Christchurch community.
