

#### 4. TRIPLE BOTTOM LINE FRAMEWORK:

Our new CEO will have a number of measures as part of her performance contract. Before we can agree on what these measures are, as a Council we have to be absolutely clear on how we intend putting in place the triple bottom line framework for both this Council, and the city. With this in mind over the next couple of months I will be working carefully with senior staff and Councillors and Community Board members, using a variety of methods, both formal and informal, to make sure that we, as an organisation, and as a city, have a clear and measurable direction which promotes a sustainable environment, community and economy.
