

## 5. NEWNHAM TERRACE, RENEWAL

The City Streets Manager sought Board approval to release a publicity leaflet on the proposal to renew the kerb and channel, footpaths and grass berms in Newnham Terrace.

Initial discussions with local residents identified a wish for increased planting, and on-street parking (several of the properties have blocks of flats on them).

Some concerns were expressed by Board members regarding onsite and offsite car parking and the reduction in road width to 7 metres.

The proposal had yet to be circulated to the wider community; the Board **decided** that the proposal be approved for public consultation.
