

12. MCFADDENS ROAD TRAFFIC CALMING

The Board considered a report from Basil Pettigrew, Traffic Engineer – Community, outlining a proposal arising from problems associated with speeding vehicles in McFaddens Road between Cranford Street and Croziers Road.

The Board **resolved**:

1. That the City Streets Unit continue to monitor speeding and safety concerns in McFaddens Road to ensure that the proposed scheme is actioned within the Neighbourhood Improvement Works budget when the required ranking is met.
2. That, in view of the low priority currently given to this project, the Board consider making Board project funding available.
3. That the speed trailer be placed in McFaddens Road over a seven day week, if possible.
