

6. PROFESSIONAL SERVICES FOR CWTP WASTEWATER EFFLUENT DISCHARGE PROJECT

The Committee considered a report from Mr John Moore, City Waster and Waste Unit regarding the procurement of professional services in relation to the wastewater outfall.

The report provided details of the consultants who had been engaged and their respective roles and those elements of the project which would be subject to competitive pricing.

The Committee approved the process outlined in the report and requested that further information be supplied to it in due course giving details of the budget costs for this part of the project for both professional services and consultation.
