

3. TOWER JUNCTION DEVELOPMENT ROADING IMPROVEMENTS

At the 4 June 2003 meeting of the Board, a presentation was given on this major retail development in Addington in respect of the associated roading works.

The timetable for this work was very tight, as the development is scheduled to open this November. The Board approved the plans for the changes in traffic management (associated with the development) for public consultation.

The Board received a full report on the outcome of the public consultation, which has been successfully concluded.

The Board **received** the information and indicated its support of the Traffic Management Plan for this major development.
