

## 18. CHRISTCHURCH WASTEWATER TREATMENT PLANT: RESOURCE CONSENT PIPE ROUTE

The Committee considered a report from John Moore, Senior Planning Engineer, City Water and Waste Unit advising it about progress on the further consultation undertaken relating to Jellicoe Street as a possible pipe route for the ocean outfall wastewater discharge. It noted that a further report would be provided in August 2003 giving more detail regarding issues identified from the consultation process and summarised some of those issues.

Details of the previous background of the consultation process and significant issues identified to date were contained within the report.

The Committee **resolved** that a meeting of the Sustainable Transport and Utilities Committee be held on Monday 21 July 2003 at 9.30am to:

- (a) Allow all members of the Committee to hear oral submissions.
- (b) Consider all the submissions and report the results to the 28 August 2003 Council meeting.
