

12. STRATFORD STREET – PROPOSED KERB AND CHANNEL RENEWAL

The Board was requested to approve for construction, the renewal of the dish channels for the full length of Stratford Street.

Details of the feedback received on the previously circulated concept plan and the amendments subsequently made to the plan were highlighted in an accompanying officer's report.

The Board was also advised that street residents were still working to complete a 50/50 cost sharing proposal with the Council for the undergrounding of the overhead services in the street.

Members expressed their support for the residents' initiative and noted that more time was required to complete their efforts.

The Board therefore **resolved**:

1. That the submitted plan be approved for tender subject to the known outcome (within three months) of the residents' endeavours regarding any funding contribution for undergrounding the overhead services in Stratford Street.
2. That the stopping of vehicles be prohibited at any time on both sides of Stratford Street commencing at the northern boundary of No. 22 and extending in a northerly direction for a distance of 29 metres.
