

13. ADOPTION OF THE CHRISTCHURCH PUBLIC PASSENGER TRANSPORT STRATEGY UPDATE

The Committee considered a report from Robert Woods, Transport Planner Public Transport and Sustainability, City Streets Unit presenting the proposed Christchurch Public Passenger Transport Strategy Update for adoption.

The report advised that this was an update of the strategy first produced jointly by the Christchurch City Council and Environment Canterbury in 1998, entitled 'Our Future - Our Choice'. It noted that a full review of the strategy would be undertaken in two-three years time but that, however, as five years had nearly passed since the document was first published, an update was now appropriate.

The report outlined details of the work on the strategy undertaken since November 2002 and other key points concerning the strategy.

After discussion the Committee **decided** to defer consideration of the proposed strategy to a special meeting of the Committee to be convened for this purpose.
