

12. HARAKEKE STREET – PROPOSED KERB AND CHANNEL RENEWAL - UPDATE

The Project Consultation Leader, City Streets Unit, requested that the Board approve for construction the renewal of the dish channels on both sides of Harakeke Street from Rochdale Street to its northern end. This request followed the earlier (November 2002) distribution of the publicity pamphlet for the project and the resulting community feedback to that plan and of the City Streets Unit's modifications to the plan as a consequence of the responses received.

The Board **resolved** that the plan as now amended, be approved for construction.
