

### 13. CHEMICAL GROUTING OF SEWERS

The Committee considered a report seeking approval for a performance based variation to the sewer reticulation maintenance contract between the Council and City Care Ltd to include chemical grouting of sewers in the current Sewer Maintenance Contract (CN 2000/01-78).

The report provided details of this tender and options in terms of section 247E(1) of the Local Government Act 1974 and provided details on the reasons why the work should not be put to tender.

Details of the background to the programme of sewer rehabilitation by chemical injection (grouting) in the contract variation was supplied to the Committee. The Committee **resolved**:

1. That for the reasons outlined in the report the work not be tendered.
2. That City Care Ltd's price of \$631,095 per annum for carrying out the sewer grouting programme be accepted and the appropriate items and rates be included as a Contract Variation to the ongoing Sewer Maintenance Contract (CN 2000/01-78).
