

## 6. NORTHLANDS MALL REDEVELOPMENT: ASSOCIATED TRAFFIC MEASURES

The Committee considered a report from Paul Roberts, Transport Planning Engineer, City Streets Unit providing an update to the proposed redevelopment of the Northlands Mall and in particular seeking comment on associated changes to the surrounding road network on Langdons Road, Main North Road and Sawyers Arms Road.

The report outlined the current redevelopment being undertaken at the Mall, which will substantially increase the present shopping area and provide approximately 700 additional new carparks.

It noted details of the resource consent which applied to the Mall development and associated traffic management measures in respect to:

- Langdons Road,
- Main North Road,
- Sawyers Arms Road,

and provided details of the proposed consultation/decision process.

Members noted the planned provision of a roundabout at the intersection of Langdons Road, Restall Street and Sissons Drive and expressed some concern in regard to this in relation to its use by cyclists and queried whether provision of traffic signals would be more appropriate at this time.

The Committee **decided** that the information be received, the proposed scheme be endorsed and additional information in relation to the use of the proposed roundabout by cyclists and the provision of traffic signals, as opposed to a roundabout, be reported back to the Committee together with the results of the consultation.
