

13. VICTORIA STREET PETERBOROUGH STREET (WEST) IMPROVEMENTS

The Committee considered a report from Peter Atkinson, Transport Planner, City Streets Unit seeking approval to the implementation of improvements at the intersection of Victoria Street and Peterborough Street as part of the restoration of this area following its use for construction activities at No. 52 Peterborough Street.

The report noted that a unique open space existed in this area which was a significant feature of the Victoria Street landscape and the opportunity now existed to enhance the area and to overcome problems with the roading layout.

Details of the work together with a plan were contained within the report and it was noted that no road stopping procedures would be required nor were there any restrictions on the existing traffic movements in the area.

The Committee **resolved**:

1. That the improvement works as outlined in the plan and report be approved.
2. That consultation also be undertaken with the Victoria Neighbourhood Committee and ICON.
3. That discussion be undertaken with the Art in Public Places staff team regarding the possible placement of an artwork in this locality.
