

1. BARNETT PARK DRAINAGE COST SHARING SCHEME

The Board considered a report on a proposed flood detention basin in Barnett Park and the establishment of a cost sharing scheme to finance construction of the flood detention basin.

The Board **decided** to recommend to the Parks, Gardens and Waterways Committee that the percentage cost split between the developers and the Council be 60/40 (with the developers contributing 60 per cent of the construction cost and the Council contributing 40 per cent) based on the increased flood risk created by the planned development.
