

10. SUSTAINABILITY IMPROVEMENTS RELATING TO THE COUNCIL'S FLEET

The Corporate Services Manager reported, updating the Committee on the above topic. The report covered the improvements achieved within conventional technologies, hybrid cars, LPG as an alternative fuel, diesel substitution for petrol, hydrogen fuel cell vehicles and central government action.

The Committee **decided**:

1. That the information be received.
2. That staff continue to monitor technological progress by the motor industry and report annually on new opportunities becoming available to the Council and environmental improvements achieved.
