

## 12. LTSA - PEDESTRIAN AND CYCLIST SAFETY FRAMEWORK CONSULTATION

The Committee considered a report from Heather Wallis, Graduate Transport Planner, informing the Committee of the Land Transport Safety Authority's Pedestrian and Cyclist Safety Framework draft which had been released for consultation.

The report provided brief details of the framework which sets out a comprehensive approach to improving the safety of pedestrians and cyclists and reducing risk by the use of best practice safety interventions in the areas of engineering, education and enforcement.

The report noted that Council staff had been involved in the development of this framework which also included substantial input from other stakeholder groups and organisations.

The Committee **decided** that the preparation of a final submission on the framework be delegated to staff to be ratified at a subsequent Committee meeting.
