

## 5. BUILDING BILL

The Environmental Services Manager advised the Committee that the Government Administration Select Committee had called for submissions on the Building Bill by 31 October 2003. The Bill follows the Government Administration Committee's inquiry into the Weathertightness of Buildings in New Zealand and the Ministry of Economic Development's discussion paper entitled "Better Regulation of the Building Industry in New Zealand".

The Committee **decided** that the Council's response to the Building Bill submissions be further considered at the ordinary meeting of the Regulatory and Consents Committee on 17 October 2003.
