

## 5. REVISED DRAFT CITY-WIDE PLANTING STRATEGY

<b>Officer responsible</b> General Manager, Strategic Development and Acting Planning Manager, Ian Hay	<b>Author</b> Liz Briggs, Policy Leader, Open Space and Water, DDI 941-8641
---	--

The following report was submitted to Council on 30 June 2004.

The purpose of this report is to inform the Community Board of the background and purpose of the draft Citywide planting strategy and to seek a submission from the Board in line with the consultation process outlined in the committee report.

### BACKGROUND

A draft Citywide Planting Strategy has been considered by the Parks, Gardens and Waterways Committee. It was presented in the form of powerpoint presentations by staff and copies of the draft Strategy have been separately circulated to councillors.

During and after the presentations, requests for suggested changes were made by committee members and these have been incorporated in the revised draft.

They included:

- (a) A new and more colourful cover that included the range of planting available for public spaces.
- (b) The inclusion of the checklist "Best Practice Guide for Designers" as an Appendix.
- (c) An action plan to implement the strategy.
- (d) Additional information and images on the "key elements" of the framework.
- (e) Inclusion of recent examples of successful planting carried out by the City Council.
- (f) More information on "sustainable planting practices" including the advantages of using a "natural ecological systems approach" in the appropriate circumstances.
- (g) Using the phrase "right plant, right place" as a theme in the document.

Submissions received on the previous "internal" draft (2000 version) included the following key points:

- (a) The need to find an appropriate method to implement the policies and principles in the Strategy.
- (b) The need to identify and incorporate linkages between the Strategy and other strategic documents and plans in the Council, such as the Waterways Asset Management Strategy, Parks Management Plans and Concept Plans for "icon" and heritage parks, the Neighbourhood Improvement Plan programme and the planting programme for the Transport and City Streets Unit.
- (c) The need to reflect the true balance and spectrum of planting between exotics and natives, while maintaining the "right plant for the right place" philosophy.
- (d) Once the content of the Strategy had been agreed, and the Draft revised, consultation should be carried out both within the organisation and with key stakeholders, including Tangata Whenua and the Community Boards.

These points have now been incorporated.

### THE DESIGN PROCESS – HOW TO PUT THE RIGHT PLANT IN THE RIGHT PLACE

The Citywide Planting Strategy is a framework and philosophy to guide the planting practice in the Council's public open spaces. However, the principles will be implemented through a series of other council and community initiatives, as illustrated in the revised draft. Also, to ensure that the agreed outcomes are achieved on the ground, it is important that the "designers" of the planting plans are given the appropriate brief, resources and time, including methods for integrating design initiatives across the organisation. To achieve this, the recommendation in a previous report (April 2004) that: "an agreed design process for determining planting in public spaces be developed and implemented by the appropriate senior managers in the City Environment Group and Strategic Development Group" was approved by Council at the 22 April 2004 meeting.

### RECOMMENDED CONSULTATION PROCESS

It is recommended that once the Council has agreed on the content and format of the draft Strategy the document be circulated for submissions to the following groups and key stakeholders over a six week period:

**External**

- New Zealand Institute of Landscape Architects
- Central City Mayoral Forum
- Christchurch Beautifying Association
- Urban Landscapes Group
- Civic Trust
- Friends of the Botanic Gardens
- Canterbury Horticultural Society
- Environment Canterbury

**Internal**

- Garden City Subcommittee
- Community Boards
- Greenspace Unit
- City Transport Unit
- City Solutions
- Communications and Consultation Unit

**Staff**

**Recommendation:** That the information be received.

**Chairperson's**

**Recommendation:** For discussion
