

2. CENTRAL CITY SOUTH

9.30AM-11.30AM

- Introduction - Michael Theelen and Carolyn Ingles
- Report and Recommendations - Maurice Roers

One key element of the Central City Revitalisation Project is the development of the area to the south of Lichfield Street. To support this initiative, a planning and design workshop was held in March focusing on redevelopment in the central city south. From that workshop, a report was produced by the consultant team which outlined their recommendations on how best to spur revitalisation in the area. This seminar will review these recommendations and discuss how the Council can implement them.
