

## 6. CORRESPONDENCE

The Committee considered correspondence from Environment Canterbury concerning the review of the northeast Christchurch bus service. This provided details of the feedback from the primary consultation and of the changes provided to two services; the no 46 Shirley via The Palms, which would be rerouted along Hammersley Avenue and the no 41 Horseshoe Lake service which would be discontinued.

Members expressed concern at the discontinuation of the service to the Horseshoe Lake area. It was **decided** that the matter be further investigated by staff and discussed at the seminar meeting of the Committee to be held on 15 April 2004 with a view to providing guidance to staff on the lodging of a submission with Environment Canterbury objecting to this change.
