

4. POOL DEVELOPMENT PROPOSAL – EDGEWARE POOL

The Committee considered a report from Lyall Matchett providing information on a proposal from the Canterbury Water Polo Association to upgrade Edgeware Pool for use as a water polo training centre.

The Committee **decided**:

1. That the Aquatic Facilities Strategy currently being prepared address the issue of the shortage of deep water space.
2. That the Jellie Park Project Control Group undertake preliminary estimates to determine the cost of including an 8 lane x 25 metre x 2m depth pool suitable for water polo and other aquatic activities requiring deep water as an option for the redevelopment of Jellie Park and report to the Committee as soon as practicable.
