

2. FERRYMEAD BRIDGE LIFELINES PROJECT

The Board considered a report seeking its support for the recommended option for the Ferrymead Bridge project.

The Board **received** the information and **decided** to recommend to the Sustainable Transport and Utilities Committee:

1. That Option 2 (strengthening/widening the existing bridge) be supported for consultation.
2. That Option 2 be modified to allow for an on demand right turn for motorists and cyclists out of Bridle Path Road on to Main Road.
3. That the need for widening Bridle Path Road to improve pedestrian and cyclist amenity along the riverside be investigated in conjunction with this process.
4. That options for the resiting/replacement of Cob Cottage be investigated as a separate project and co-ordinated with the bridge if possible.
