

16. COLONIAL LANE UPGRADING

The Committee considered a report seeking retrospective approval to upgrade Colonial Lane. The report noted that during the public consultation process related to Stage V of Cathedral Square the Committee had indicated support at a seminar to upgrading Colonial Lane after consultation with the owner of the land and adjoining building owners/occupiers.

In view of the fact that the conversion of capital expenditure to operations expenditure of some \$35,000 was required in respect of this item (as the work is on privately owned land) the approval of the Committee had been sought to formally approve the project.

The Committee **resolved** to retrospectively approve the upgrading of Colonial Lane.
