1.1 SAFETY ISSUES AT BRIDGE STREET/PINE AVENUE INTERSECTION

Maree and Bevan Clark were in attendance to raise concerns about road safety at the Bridge Street/Pine Avenue intersection in South New Brighton, where there was recently a fatal accident. As long term residents on the corner, they recalled a significant number of vehicle accidents and near accidents in the past and they had previously sought remedial measures. In their view, a small traffic island at the intersection on Pine Avenue to slow vehicles and stop vehicles from cutting the corner would be more effective than road narrowing.

The Board **decided** to request the Transport and City Streets Unit to report on safety issues at the Bridge Street/Pine Avenue intersection, for consideration at the Board meeting on 21 June 2004.
