

8. BOTANIC GARDENS

The Committee **received** a report from Crispin Schurr (Architect, City Solutions Unit) outlining progress with the Botanic Gardens masterplanning project. The report outlined:

- background
- scope
- consultation
- communication

The report signalled that critical to the success of the project would be the preparation of a detailed design brief that reflects the needs of the community. The report concluded by stating that the next quarter would see the conclusion of public consultation, the interpretation of user needs and the preparation of the design brief.

The design brief would be placed before the Committee for approval.
