

## 5. PRODUCT STEWARDSHIP AND WATER EFFICIENCY LABELLING

The Subcommittee **received** the content of the Christchurch City Council's submission regarding the Ministry for the Environment's discussion paper on product stewardship and water efficiency labelling.

Members expressed their appreciation to the Christchurch City Council for sharing this information with the Subcommittee.

In addition, the Subcommittee **resolved** that a letter be forwarded to the Ministry for the Environment noting that the Canterbury Waste Subcommittee had received the submission made by the Christchurch City Council and whilst some of the individual member councils may not have considered and responded on the matter, the Subcommittee endorses the submission made by that Council.

Staff undertook to circulate to members, a copy of the forwarded correspondence.
