5.3 Spencerville Residents' Association

Grant Edwards of the Spencerville Residents' Association addressed the Board regarding flooding issues in Heyders Road.

Concerns raised were:

- surface water on road and driveways not draining away especially where driveways dipped to follow the swale
- muddy unsightly road edges due to the inability of grass to grow in waterlogged ground
- swale not having desired affect and worries of bad design

The Board expressed concern that this matter had been brought to the Board's attention several times and yet there still seemed to be ongoing flooding problems in the area.

The Board **resolved** to request that staff investigate and report back on the effectiveness of the design of the swale and the drainage problems in the surrounding area of the intersection of Heyders Road.

The residents of Courtenay Street were concerned that the kerb and channel upgrading of St Albans Street and the associated street enhancement could affect traffic flows and speeding in their street.

Specific concerns raised were:

- That the residents of Courtenay Street were not consulted on the proposed street works.
- Issues surrounding the designation of the road and the lack of success in getting the designation lifted or changed.
- Conflicting information supplied by various staff in relation to the designation issue.
- That although the residents of Courtenay Street were told that the work did not affect their street the report mentions Courtenay Street several times in relation to the proposed street works.
- That the Council was disregarding the concerns of the residents and this was indicated by the lack of progress in resolving the issues that surround Courtenay Street and the adjacent neighbourhood.

The Chairperson thanked the street representatives and assured them that although the report had been deferred to the following meeting, staff had been asked to incorporate responses to the questions and concerns raised.
