

9. STRUCTURE ON STREET APPLICATION - 150 MCCORMACKS BAY ROAD

The Board considered a report seeking approval to a "structure on street" application for the erection of a new double garage at 150 McCormacks Bay Road. A single garage on site will be demolished to make way for the new structure and staff confirmed that the application complied with the Council's Structure on Street Policy and would have minimal effect on the road.

The Board **resolved**:

1. To approve the application for a structure located partially on legal road adjoining 150 McCormacks Bay Road.
2. To revoke the current deed of licence for the single garage and enter into a new agreement for the proposed double garage.
3. To seek a review by the Council of the existing "Structure on Street Policy" having regard to the impact of this policy in the Board's area.

(Note part three of the above resolution is reported under item 1 in "Part A" of this report as it requires a Council decision).
