

12. CENTRAL CITY LOADING ZONE REVIEW

The Board considered a report informing it of a review of loading zones within the central city area. The review resulted from the need to consider the provision of loading zones comprehensively across the central city area to ensure consistency and the most efficient use of kerbside parking space. As the recommendations within the report related both to the central city area, outside the Board's delegation, and to the Board's area the Board's recommendation in respect to the central city area is contained in Part A of this report.

The Board **resolved** to adopt the staff recommendations in respect to those streets in its area and within its delegations as contained in recommendations 2(a) to (k) on pages 35 to 38 of the report.
