

Property Holdings

Attached are two property related reports. The first is the current planned sale programme. The second is a full list of properties held by Council as per our SAP records. It is fair to say that the quality of some of the data, particularly the property classification, is somewhat general in nature as recorded in the system.

As I understand it, in the early 90s the Council embarked on an exercise to review the properties it owned and developed a list of properties that appeared to be no longer required for operational purposes, i.e. "potentially surplus". The exercise was never fully completed but they did start working through the list they had partly developed to determine the future use of those properties – whether that resulted in a sale or resolution to keep them for another internal / public purpose. The programme we are currently working through includes the difficult ones from the earlier review, i.e. those that have some complexity associated with them or require a business decision to be made first. The list also includes properties that we have become aware of or have been brought to our attention over the last few years.

In addition please note:

- Without going into detail there is quite a process to go through before a property would actually arrive at a point where it could be sold, i.e. this is not a quick "silver bullet".
- Due to the earlier review and our awareness of the Council's property holdings in general, we do not believe there is much of significance that we haven't already identified.
- Currently undertaking a full review of all property holdings (which would be a significant task) is not on our priority list.
- Properties have been added to the list every year as they come to our attention or as changing business needs require.

To achieve anything significant may require a policy / strategy change, e.g. to sell housing, reserves or community facilities.
