Ronald FUNG

Independent for Christchurch 2021

Having served our community for several years, I understand its needs. I have considered a number of issues that are important for the quality of life and living standard of Christchurch people. They are to improve road safety in school zones, set up community crime watch programmes, encourage the use of public transport, maintain public facilities to a high standard, create job opportunities, and promote local business. It is important to keep Christchurch 'clean and green' and to seek effective ways to keep air pollution at low levels. Community support programmes are essential to the city and I want to establish support services for senior citizens and children, and services to encourage self-developments and motivation in teenagers. I believe that in order to be an effective Councillor it is important to hold regular meetings with the citizens and to build up networks for local and ethnic groups. Phone 3588218.
