

CHRISTCHURCH CITY COUNCIL

Election of FIVE (5) Members of the Lyttelton/Mt Herbert Community Board

Stuart BOULD

I am a current Lyttelton Mt Herbert Community Board member and was a Councillor for BPDC during amalgamation. . I believe Banks Peninsula is being very well served by the amalgamation process. Continuity of effort and knowledge gathering about the large organisation that is the CCC is important in this transitional period. The present Community Board members are working well

together, to pass on the views, expectations, and values of the Peninsula communities and I think the CCC staff enjoy working with us in the “new territories”.

I work as an electrical engineer, using NZ and offshore suppliers. I believe this brings a sense of practicality to this job. My particular interests are improving the infrastructure of our communities to match needs of rapidly growing communities. -- water, roading, wastewater, storm water,. I attend 2 committees grappling with water quality and a major wastewater treatment review for the Harbour basin.
