SUBMISSION Re SOLID WASTE RECYCLING:

Please consider re-introducing Council recycling of organic waste.

Reasons: 1) A significant proportion of our home rubbish bag is filled with organic waste.

Why? Because our home compost does not get hot enough to destroy codlin, diseased peelings & such-like, nor our "small green waste" of twitch & convolvulus which would flourish in our household ^{compost} bins.

(Where else to dispose of it?)

2) On several occasions I have rung the City Council & have been assured that the Council is working towards sustainable recycling.

Please keep faith with us. We want to see our waste of any kind used as a valuable natural resource.

Yours concernedly,

Elspeth Williams.
