Dear Sir/Ms

re Solid Waste Action Plan

As our section is fairly small, we generate a limited amount of green garden rubbish.

I was extremely annoyed to-day to be charged \$5.80 at Parkhouse Refuse Station instead of the usual \$3 as last year.

I also dispute the weight of 100 K.G. for 3 small plastic bins and 3 small sacks containing mainly leaves and begonia tops - all of this carried in the boot of a lift-back car.

I note with interest the statement on Page 16 of today's New Advertiser that the plan proposes to lower the fee for separated green waste at the transfer station. Strange way to reduce it when it goes from \$3 to \$5.80!

It would be pleasing to receive your explanation before taking the matter further.

Yours faithfully  

P. F. MAPLES
